#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. #### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 16-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to

Art Unit: 1615

one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Claim 16 recites the following limitation: "...a thick, homogeneous, dry, layer of such a quantity as to correspond substantially to an amount greater than one precise dose..."

After carefully examining the instant disclosure, the examiner respectfully submits that support for these amendments is lacking and the addition of said limitations is new matter. Specifically, the above limitations are not set forth in the original specification.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Al Ani (U.S. Patent No. 3,948,265).

Al Ani discloses a styptic applicator (see abstract). Active substance may be applied to one or both ends of the applicator (see col. 2, lines 60-68). The disclosed applicator can be disposable (see col. 4, lines 3-7). The stem may be manufactured of a natural or man-made material (see col. 3, lines 18-24).

### ***Response to Arguments***

Applicant's arguments filed 18 June 2007 have been fully considered but they are not persuasive.

Applicants argue, "[i]n order for a claim to be anticipated it must have each and every element as set forth in the claim..." See remarks, page 10.

Examiner respectfully submits that the prior art anticipates the instant application as claimed. See substantive rejection, above.
